Seresto® small dog
for 8-month prevention and treatment of ticks, fleas and lice on small dogs and puppies 7 weeks of age and older and up to 18 lbs. (8 kg)

Seresto® large dog
for 8-month prevention and treatment of ticks, fleas and lice on large dogs and puppies 7 weeks of age and older and above 18 lbs. (8 kg)

• Repels and kills fleas and ticks.
• Repels and kills ticks for 8 months, including Deer ticks (vector of Lyme disease and anaplasmosis), American dog ticks (vector of Rocky Mountain spotted fever and ehrlichiosis), Brown dog ticks (vector of ehrlichiosis, anaplasmosis, bartonellosis, canine hemoplasmosis, babesiosis, and Rocky Mountain spotted fever), and Lone Star ticks (vector of ehrlichiosis).
• Prevents tick infestations within 48 hours after application.
• Re-infesting ticks are repelled and/or killed as quickly as 6 hours.
• Treatment with Seresto kills fleas that may vector tapeworm infections (Dipylidium caninum), bartonellosis (Bartonella vinsonii, Bartonella spp.), and rickettsiosis (Rickettsia felis), which are types of canine vector borne diseases.
• Re-infesting fleas are killed within 2 hours with protection against further flea infestation lasting 8 months.
• Kills and repels fleas before they lay eggs.
• Seresto aids in control of flea larvae in the dog's surroundings following contact with a Seresto-treated dog.
• Kills chewing lice.
• Aids in the treatment and control of Sarcoptic mange on dogs.
• No need to remove collar when your pet goes swimming or gets bathed.
• Bayer Polymer Matrix ensures that both active ingredients are continuously released in low concentrations.

• Make sure to replace the collar after 8 months for year-round tick and flea prevention.
• Light reflectors for added visibility in the evening and at night.

ACTIVE INGREDIENTS: % by Weight
Imidacloprid .................................................. 4.5%
Flumethrin* .................................................. 10.0%
Other Ingredients ............................................. 85.5%
Total .......................................................... 100.0%

* Trans Z-1/trans Z-2 ratio: max 66 % trans Z-1 and min 34 % trans Z-2

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not contaminate feed or food.

HOW TO APPLY
One collar per animal to be fastened around the neck. Remove collar from protective bag directly before use. Unroll collar and make sure that there are no remnants from the plastic connectors inside the collar.

Insert end of the collar through the buckle. Adjust the collar around the animal’s neck without tightening it too tight or leaving it too loose. As a guide, it should be possible to only insert 2 fingers comfortably between the collar and the neck. Pull excess collar thru the loop(s). Collar length of greater than 1 inch (2 cm) beyond the loop(s) should be cut off unless it is on a growing puppy, where some additional length may be needed for adjustment as the animal grows.

After application of the collar, three reflector clips may be fixed permanently to the collar to increase the animal’s visibility in the dark. Take the clips out of the bag. The clips should be evenly distributed on the non-overlapping part of the collar. The clips are correctly applied when a clicking sound is heard. For safety reasons once the reflectors are fixed to the collar the clasp closes permanently and cannot be re-opened.

The collar should be worn continuously for the 8 month protection period. Check periodically and adjust if necessary, especially when puppies are rapidly growing. Rarely, mild application site reactions may occur, such as scratching, redness and hairloss, which usually recover within 1-2 weeks without the need for collar removal. In some cases, temporary collar removal and bathing may be recommended until symptoms have disappeared. In very rare cases, application site reactions such as dermatitis, inflammation, excoriations or lesions may occur. In these instances, collar removal is recommended. If signs persist, or become more severe, consult a veterinarian immediately. If your animal is on medication, consult your veterinarian before using this or any other product. If your dog is experiencing an adverse event, contact your veterinarian and call 1-800-422-9874.

This collar is designed with a release mechanism. In the unlikely event of a dog being trapped, the dog's own strength is sufficient to widen the collar to allow for quick release. Replace the collar after 8 months for optimal tick and flea protection.

PRODUCT INFORMATION
Kills fleas which may cause flea allergy dermatitis (FAD) or flea bite hypersensitivity (FBH). Seresto kills existing fleas on dogs within 24 hours. Re-infesting fleas are killed within 2 hours with protection against further flea infestation lasting 8 months. Pre-existing pupae in the environment may continue to emerge for six (6) weeks or longer depending upon the climatic conditions.

Seresto aids in control of flea larvae in the dog’s surroundings following contact with a Seresto-treated dog.

Ticks already on the dog prior to treatment may not be killed immediately after collar application and may remain attached and visible. At the time of application remove ticks already on the dog.

The prevention of infestations with new ticks starts within 48 hours after application of the collar.

- Re-infesting ticks are repelled and/or killed as quickly as 6 hours.
- Kills lice on dogs.
- Aids in the treatment and control of Sarcoptic mange on dogs.
- For external use on dogs only. Do not use on other animals.
- Do not use on puppies under seven weeks of age.
- Do not get this product in dog’s eyes or mouth.
- As with any product, consult your veterinarian before using this product on debilitated, aged, breeding, pregnant, or nursing animals.

For medical emergencies involving HUMANS or ANIMALS, call 1-800-255-6826.
