Fox Valley Day-One Formula for Squirrels 32/40

Fox Valley formula instructions

MIXING DIRECTIONS
Add powder to warm water (100F) and shake in a bottle until well blended. Store leftover formula in refrigerator. Feed blended formula within 24 hours. Mixing directions are based on volume, not weight, measurements.

FEEDING DIRECTIONS

Eastern Cottontail: Mix 1 part powder to 2 parts warm water. Feed 1 - 1 1/2 teaspoons per one ounce bodyweight daily, divided into 2 to 4 feedings.

Squirrels: Mix one part powder to 2 parts warm water. Feed 1 1/2 - 2 teaspoons per one ounce bodyweight daily, divided into 6 to 8 feedings. At 4 weeks of age, gradually switch to DAY ONE formula 20/50.

Opossums: Mix 1 part powder to 2 parts warm water. Feed 1 1/2 - 2 teaspoons per ounce bodyweight daily, divided into 6 to 8 feedings. At about 45 grams bodyweight, gradually switch to DAY ONE formula 25/30. Gradually decrease quantity of formula and number of feedings per day as weaning approaches.
